

The becker sounds b202 is a 2-way home cinema ceiling speaker including an associated cloud-capable DSP amplifier. It features our new hybrid technology, which combines the advantages of passive and actively controlled speakers. The state-of-the-art DSP amplifier also allows the use of a parametric equalizer for manual room measurement.

As the b202 is a bass-limited speaker, you will need a suitable subwoofer system.

## Technical Data b202

|   |                        |
|---|------------------------|
| Frequency Response (+/-3dB)                     | 80 Hz – 20 kHz         |
| Maximum SPL free field at a distance of 1 meter | 110 dB                 |
| Horizontal directivity                          | +/- 45°                |
| Vertical directivity                            | +/- 45°                |
| Tweeter   | 1,7"                   |
| Bass driver                                     | 8"                     |
| Connection options                              | Analog und Dante/AES67 |
| Dimensions (W x H x D)                          | 50 cm x 20 cm x 33 cm  |
| Acoustic center from the lower edge             | 10 cm                  |
| Weight  | 37 Kg                  |
